

Hi to Pam's Students! I miss you!!:) Please remember to call me about needing help with any of these or if you want to chat: 907-306-0837. And call me if you would like more work in any subject. I would be happy to prepare that.

We are each doing a video on Tebughna Facebook page every week. Hope you enjoy them.

By the way, join my 30 day exercise challenge with me! One minute of any exercise every day. I will send you a goodie if you send me a photo of you doing them! I will be doing planks for one minute a day.

Reading:

Five Scholastic magazines for you to read. One daily and answer questions throughout. Also, two grammar sheets to complete.

Math:

Three sheets of word problems. You can use the calculator on your phone. Draw pictures along the way to help solve the problems.

One sheet comparing fractions. Draw a picture of each to help you to compare.

One sheet of fractions to angles. Remember a circle is 360 degrees. So take your fraction and multiply that by 360 for your answer.

Example: #1 is $\frac{1}{2} \times 360 = 180$ degrees.

#4 is $\frac{1}{3} \times 360 = 90$ degrees.

#7 is $\frac{2}{10} \times 360 = 72$ degrees

Science:

You have pages 58-68 of Life Skills for Science.

Sociology:

Painting of the drum you began.

Have fun. Remember to work on these every day for an hour and a half.

We will pick them up on each Monday as we drop off your new work.

Please put your work back into the plastic bag with your name on it.

I love you! Pam XOXOXOXO
